

Video Story Problem - think-through

Name:

Date:

What math concepts or ideas will your video be about?

What is a setting that you would see this mathematical concept/problem? In other words, where do you see this math in real life? Also, what is the question you are asking?

What is the mathematical problem that your problem will demonstrate? Show the the actual math part, including work.

What materials will you need?

What important information do you need to provide to the audience?

Is the information you are providing accurate?  
Is your problem and answer reasonable?

On the back write a script for how the video problem will go.
