

Video Story Problem - Think-Through

Name:

Date:

What math concepts or ideas will your video be about?

What is a setting that you would see this mathematical concept? In other words, where do you see this math in real life? Also, what is the question that you will be asking?

What is the mathematical problem that your problem will demonstrate? Show the the actual math part, including work.

What materials will you need?

What important information do you need to provide to the audience?

Is the information you are providing accurate?
Is your problem and answer reasonable?

Sharing- check whichever apply

_____ My video can be posted online

_____ My video can be shown to my class

_____ My video can be shown to other classes

_____ I do not want to share my video at all

On the back, write a detailed script for how your video will be shot. Make sure to be specific in what you will say.
